As our first step to address the challenges presented by the COVID-19 pandemic, TBAC is launching a campaign to support schools in providing a safe and healthy learning environment.

**1) Education Team**

- Annual national exams scheduled to start on 16 March. BAC is providing guidelines to schools to conduct exams in a safe manner.
- A dedicated group of community volunteers are working with BAC to ensure safe conduct.
- No outside visitors will be allowed during the exams.
- For elementary students, the teachers will provide counseling.

**2) Empower Team**

Unlike academic learning, our Empower team promotes participatory and empowerment models. Success is due to the involvement of teacher and students' peers in group activities, which provide the following resources to students:
- Monthly meetings for home-based learning by students and teachers.
- Delivery learning materials through WhatsApp groups.
- Teachers' collaboration will be vital for empowering learners and creating opportunities.

**3) Health Team**

This March, we continue our growth monitoring through weight and height measurement for our students. During this crisis, we are also distributing Hand Wash Software (HWS) and providing COVID-19 awareness and safety guidelines to all students.
- Every family has different knowledge, and we benefit from a variety of sources.
- Monitoring children who have been infected.
- All cases of malnutrition are identified and addressed.

**4) Bamboo Team**

All work done by thebambooteam.com on our school campuses.

Finally, we welcomed the COVID-19 response teams to our school campuses from 08:30 to 08:30. The drills are still learning to manage the pandemic.
